

# Ultrasound No Preparation

## What will happen after the Ultrasound?

The radiologist will send the ultrasound report to your physician. The results will be given to you by your physician.

## What is an Ultrasound?

An Ultrasound is an imaging method that uses high-frequency sound waves using a transducer to produce images of structures within your body.

## What will happen during the Ultrasound?

You may be asked to wear a hospital gown. A gel (which wipes off easily) will be applied directly to the skin surface and a series of pictures will be taken of the body part being examined. The Technologist will be taking pictures and measurements during the test. The test will take between 30-60 minutes to complete.
