

The Northwestern Ontario Regional Stroke Network Presents:

Enhancing Stroke Core Competency

An interdisciplinary, facilitated & self-directed learning opportunity.
Available face-to-face in Thunder Bay and via OTN to clinicians in NW Ontario.

5 Modules: Mobility & Complications; Psychosocial Effects; Cognitive, Perceptual & Behavioural Changes; Nutrition; Continence Management

Certificate provided for each module completed

DATES:	1 facilitated session per month + independent study Wednesdays in January - June 2019 (Jan 30, Feb 20, Mar 20, Apr 17, May 15 & Jun 12)
TIME:	12:15 - 13:00 Eastern
PLACE:	Videoconference or in-person - TBRHSC: Jan-May in 3004A, June - 3141 - SJ Hospital: East Wing - Conference B (E0033)

Target Audience: Nurses, Occupational Therapists, Physiotherapists, Speech-Language Pathologists, Social Workers and Recreation Therapists working or interested in stroke.

What is expected of participants:

- to review learning objectives and complete a pre- and post-learning self-rating scale for each module, submit the self-rating scales at the end of each session
- to review suggested online resources to help enhance original knowledge base
- to attend the interdisciplinary facilitated sessions and come prepared to discuss your learning and its relevance to practice with respect to your role
