

TBRHSC Simulation Lab

Guidelines for Use

The Basic Assumption – We believe that every participant is intelligent, capable, cares about doing their best and wants to improve. This is a safe learning environment where participants may learn from their errors. Please be respectful of all participants and do not discuss what happens in simulation after you have debriefed and left the Simulation Lab.

Food and beverages are permitted in the reception and debriefing areas only. Please do not bring any food or beverages near the mannequins and equipment.

Please use only pencils near the mannequin. Do not use any ink on or near the mannequins as this will permanently stain the mannequin's skin.

Please treat the mannequins with care and respect and always wear gloves as you would in any clinical setting.

The Simulation Lab can be configured into many different settings. Please leave the Simulation Lab in an orderly fashion. Inform the Simulation Technologist of any damaged or missing equipment immediately.
