

## Exceptional Cancer Care

The Thunder Bay Regional Health Sciences Centre is inviting applications for the position of:

# Radiation Oncologist, Permanent Full-Time

Regional Cancer Care Northwestern (RCCNW) is a state-of-the-art cancer centre which provides a full continuum of cancer services. One of 14 Regional Cancer Programs in Ontario the team includes 4 Radiation Oncologists, 7 Medical Oncologists/ Haematologists, Internist In-patient team, Nurse Practitioners, Physician Assistant and 1 Palliative Care Specialist. Team members participate in clinical trials, clinical research and teaching opportunities with the Northern Ontario School of Medicine (NOSM).

The radiation treatment program has approximately 950 new patient visits each year. Treatments are delivered using two Elekta Infinity accelerators equipped with Agility multi-leaf collimators, a Siemens

Somatom Definition AS Open 64 simulator, a Philips Gemini TF PET-CT, and an Elekta Flexitron high dose rate brachytherapy system. Brachytherapy treatments are delivered in a fully shielded operating room. Simulation and treatment planning are accomplished using Elekta's Monaco and XiO systems, and the radiation oncology information system, which is also the backbone of the electronic medical record (EMR), is Elekta's Mosaik. Mosaik is used by both Radiation and Medical Oncology and its use is distributed throughout the region at affiliated sites. The system enables paperless operations and Radiation Oncology makes use of protocol driven care plans within this electronic environment.

## Serving Northwestern Ontario

Serving Northwestern Ontario: Thunder Bay Regional Health Sciences Centre serves Northwestern Ontario from east of White River to the Manitoba border in the west and from Hudson Bay in the north to the United States border in the south. Thunder Bay Regional Health Sciences Centre is the only acute care hospital in the City of Thunder Bay and operates one of the busiest emergency departments in Canada and the only one in the City. Ours is also the only tertiary hospital in Northwestern Ontario and a regional referral centre for 10 smaller regional acute care hospitals. We are a unique region with unique gaps in health care.

## Research Will Transform the Future of Health Care

The Thunder Bay Regional Health Research Institute is distinct. Until very recently, health research facilities of this calibre would be housed in a major metropolitan centre. Indeed, our scientists found that Thunder Bay's size and status as a regional hub has tremendous advantages, particularly access to collaborators. We are able to focus our research to address the health care challenges unique to our region.

## Academics & Learning

Learners play an important role at our Hospital. We are the teaching hospital of choice for learners from the Northern Ontario School of Medicine, Lakehead University, Confederation College, and other partnering academic institutions. We are an academic health sciences centre, committed to teaching the next generation of health care providers. Our new Simulation Centre allows practitioners to practice and expand their knowledge and skills within a safe and controlled environment.

## Living in Thunder Bay

In addition to working at a worldclass academic health care facility, you also have the city of Thunder Bay and surrounding area at your back door. We are known for our access to the outdoors: hiking, fishing, camping, snowshoeing, skiing; we have it all! For more information, please visit:
