Declaration of Licensee Representative

I, **Michael Campbel** having the authority to act for the licensee pursuant to Section 15 of the General Nuclear Safety and Control

Regulations, certify that all statements and representations made in this Annual Compliance Report and any supplementary pages appended to this report are true and correct to the best of my knowledge.

Title Radiation Safety Officer	Date (YYYY-MM-DD) 2021-11-08
-----------------------------------	---------------------------------

It is an offence under the Nuclear Safety and Control Act to knowingly make a false report.

For questions related to the Accelerators and Class II Facilities Division (ACFD) ACR, contact your CNSC Project Officer.

When complete, please submit this form via email to cns.acr-rac.ccsn@canada.ca

Print Form

Submit by Email

ACR forms are intended to report the licensee's activity. To request an amendment, including changes in licensee's representatives (RSO, alternate, applicant authority, signing authority), please submit your request separately to the CNSC.

The ACR **can not** be used by licensees to request changes to the licence.

Any changes requiring a licence amendment or to comply with licence conditions must be submitted separately to the Project Officer when you become aware of the change.

Ascertainment of Doses: Whole Body

Provide a summary of the annual effective whole body radiation doses received by Nuclear Energy Workers (NEWs) and non-NEWs (workers not designated as NEWs) during the year ending December 31st. Provide the information in detail, as shown below. Only report doses for staff working in Canada.

NOTE: Please do **NOT** send personal sensitive information, such as social insurance numbers, to the CNSC. If the total number of workers reported for NEWs or Non-NEWs is less than ten (10), do **NOT** report the maximum individual dose.

	Number of Workers in each effective dose category								
	BDL †	> BDL † and ≤ 0.5 mSv	> 0.5 mSv and ≤ 1 mSv	> 1 mSv and ≤ 2 mSv	> 2 mSv and ≤ 5 mSv	> 5 mSv and ≤ 20 mSv	> 20 mSv	Dosimetry Service Provider ††	Maximum Individual Dose (mSv) †††
Number of NEWs	8	1	1	0	0	0	0	HC- NDS	0.94
Number of Non-NEWs	3	0	0	0	0	0	0	HC-NDS	BDL

† BDL = Below Detectable Limits for the dosimeter being used.

†† Enter the name of the dosimetry service provider. If a dosimetry service provider is not used, enter "ESTIMATED" and provide brief details on how dose estimates were derived in the additional information area below.

††† Do not enter a non-personal dose that was the subject of a CNSC approved dose change request.

In accordance with the Radiation Protection Regulations, doses must be reported for a CALENDAR YEAR (January 1 to December 31). Please report your doses for the calendar year preceding your ACR due date (e.g. regardless of the ACR reporting date in licence condition 2912 on your licence, always report the doses for the period Jan 1 - Dec 31 of the previous calendar year).

Additional Information

Above readings are for the 12 month period ending Dec 31, 2020 based on the quarterly reporting from NDS. Non-NEW's consist of cleaning staff and a graduate student. Badges are also located in public spaces on main floor as area monitors. None of the area monitor badges have shown a reading above background.

All of the readings from Jan 1, 2021 to date have been BDL

Emails have been sent to all NEWs with their annual and lifetime doses

1	4	6	1		-	2	1		-	3	1	.	2	
---	---	---	---	--	---	---	---	--	---	---	---	---	---	--

Ascertainment of Doses – Extremity

Provide a summary of the annual equivalent extremity radiation doses received by Nuclear Energy Workers (NEWs) and non-NEWs (workers in position not designated as NEWs) during the year ending December 31st. Provide the information in detail, as shown below. Only report dose for staff working in Canada.

NOTE: Please do **NOT** send personal sensitive information, such as social insurance numbers, to the CNSC. If the total number of workers reported for NEWs or Non-NEWs is less than ten (10), do **NOT** report the maximum individual dose.

☐ Check here if your organization has no extremity dose information to submit for the reporting period.

	Number of Workers in each effective dose category								
	< 10 mSv	≥ 10 mSv and ≤ 50 mSv	> 50 mSv and ≤ 100 mSv	> 100 mSv and ≤ 200 mSv	> 200 mSv and ≤ 350 mSv	> 350 mSv and ≤ 500 mSv	> 500 mSv	Dosimetry Service Provider †	Maximum individual dose (mSv) ††
Number of NEWs	8	2	0	0	0	0	0	HC-NDS	37.5
Number of Non-NEWs	3	0	0	0	0	0	0	HC-NDS	BDL

† Enter the name of the dosimetry service provider. If a dosimetry service provider is not used, enter "ESTIMATED" and provide brief details on how dose estimates were derived in the additional information area below.

†† Do not enter a non-personal dose that was the subject of a CNSC approved dose change request.

In accordance with the Radiation Protection Regulations, doses must be reported for a CALENDAR YEAR (January 1 to December 31). Please report your doses for the calendar year preceding your ACR due date (e.g. regardless of the ACR reporting date in licence condition 2912 on your licence, always report the doses for the period Jan 1 - Dec 31 of the previous calendar year).

Additional Information

Readings are for the 12 month period ending Dec 31, 2020

Readings are the sum of left and right hand dosimeter rings

1	4	6	1		-	2	1		-	3	1	.	2	
---	---	---	---	--	---	---	---	--	---	---	---	---	---	--

Workload - Isotope Production Accelerator

Provide a summary of the workload of the Class II prescribed equipment during the reporting period for all operating modes. If you have exceeded your approved annual workload, please submit details in the "Additional Information" area below, including an explanation as to why the approved workload was exceeded, and calculations showing that doses to persons in adjacent areas are still ALARA. Note that in all cases, records of workload must be maintained for inspection by the CNSC.

NOTE: The information requested on this page may be submitted as a separate spreadsheet attached to the same email as this form. Please ensure your spreadsheet uses the same headings as in the table below, and contains all required information, or see www.nuclearsafety.gc.ca/acr for templates.

+					
	Target identifier or Part Number ¹	Annual uA-hours ²	Annual Production (GBq)	Number of batches/year	Number of targets rebuilt
-	LT - F18	2,307	4,594	62	0
	Totals	2,307	4,594	62	0

1. The target Identifier listed here should match the Target Identifier in the "Part No." column of the Appendix: Licensed Targets on your licence
2. If reporting on dual-beam targets, provide the sum of μ A-hours from both beams
3. If reporting on research/test/dummy targets, list each type of target individually
4. If different beam types were used with the same target, report each beam type on a separate line (i.e. research targets with proton beams, research targets with deuteron beam, etc.)

Additional Information

For the period from Nov 1, 2020 to October 31, 2021

Notes:

1) For Au-198 production is done concurrently with F-18 production. All Au-198 is allowed to decay in house.

Additional Information for Nuclear Substances and Class II Facilities

Please provide additional information related to the Class II prescribed equipment, as detailed below. Note that provision of this information is not a regulatory requirement; CNSC requests this information in order to examine nuclear-safety-related trends and to inform future compliance strategies.

+			
	Prescribed equipment Item Number ¹	Greatest extent servicing performed during the reporting period. ²	Radiation survey performed during reporting period? If yes, see Note 3.
-	1	Corrective	Yes

1. Refer to the sections of your licence entitled "Appendix: Nuclear Substances and Class II Prescribed Equipment" and "Appendix: Location(s) of Licensed Activities" to determine the item number of each piece of prescribed equipment. Report one item per row. Add additional rows as necessary.
2. The various extents of servicing are defined as follows:
 - Not applicable: Not licensed to service Class II prescribed equipment
 - None
 - Preventive maintenance: Limited to basic servicing activities and periodic inspections
 - Corrective maintenance: Limited to preventive maintenance, plus troubleshooting and limited repairs or adjustments
 - Extensive servicing: Corrective maintenance, plus replacement of major components, refurbishment of Class II prescribed equipment, installation or replacement of the prescribed equipment or nuclear substances contained within the prescribed equipment, or dismantling of the prescribed equipment
3. Submit the results of the most recent radiation surveys performed during the reporting period or reference it if already submitted to the CNSC during the reporting period.

Additional Information

Survey performed Nov 14th 2020 and previously submitted as part of license renewal application section F7

---	---	---	---	--	---	---	---	--	---	---	---	---	---	--

Oversight Activities – Safety Performance Indicators

Provide information regarding any regulatory oversight activity performed during the reporting period. Note that provision of this information is not a regulatory requirement; CNSC requests this information in order to examine nuclear-safety-related trends and to inform future compliance strategies.

- ☒ Performed review of radiation safety policies and procedures
- ☐ Performed self-audit/inspection of radiation safety program¹
- ☐ Performed peer-audit/inspection of radiation safety program²
- ☒ Other (please describe)

Other regulatory oversight activity or additional information

Refresher radiation safety training

Submitted application for renewal

Type 1 inspection Aug, 2021

1. Self audit/inspection is defined as an audit conducted by internal team members to determine the extent of compliance with the act, the regulations and the licence.
2. A peer audit/inspection is defined as an audit/inspection conducted by participants who have no direct responsibility in the work/process being audited in order to maintain objectivity.

Transport Carriers

List all carriers employed to transport radioactive materials for the purposes of this licence during the reporting period. Note that provision of this information is not a regulatory requirement; CNSC requests this information in order to examine nuclear-safety-related trends and to inform future compliance strategies.

+				
	Carrier Name	Contact Telephone	Full name of contact (if available)	Location of Carrier (City, Province)
-	Carrick Express Inc.	(807) 345-7331	carrickexpress@tbaytel.net	Thunder Bay, Ontario

Note: Do not list all shipments, list only carriers hired to transport radioactive materials for the purposes of this licence during the reporting period.
DO NOT include licensee employees in this list. If no carriers were hired, leave the table blank. If using the same carrier, there should be only one entry in the table.
