

STROKE, AGING, & COGNITION

A 3-Part Series

Topic 1 of 3:

Overview of Executive Function, Memory and Functional Performance

 Wednesday, January 18, 2023

 2:00 PM - 4:30 PM EST

 Virtual - Zoom

35 participant capacity
Due to limited space,
priority registration given to
those who primarily work in
stroke or ABI

THE SPEAKER

Joan Toglia
PhD, OTR/L, FAOTA

Professor, Dean Emerita, School of Health & Natural Sciences, Mercy College, NY.
Adjunct Clinical Professor, Cognitive Science in Rehabilitation Medicine, Weill Cornell Medical College, NY.

THE WORKSHOP

The workshop will define and describe updated conceptualizations of executive functioning as well as evidence demonstrating that executive function skills influence performance and participation in all aspects of function and across a variety of populations.

An in-depth review of executive function (EF) skills and the interdependence of EF with memory will provide a foundation for interpretation of functional cognitive performance errors.

Participants will apply an executive functioning framework, through written case scenarios and video clips.

Sponsored by the Northwestern Ontario
Regional Stroke Network
